

SAFETY NOTICE

MARATHON PETROLEUM COMPANY LP TRANSPORTATION AND LOGISTICS GROUP

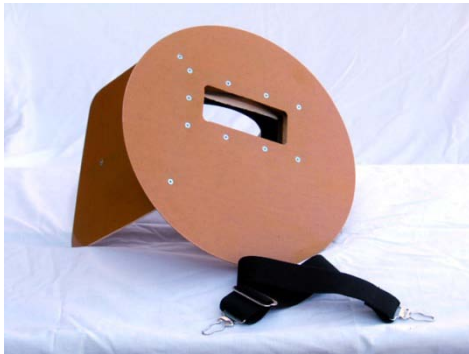

WELDING HOOD PPE

This notice affects Marathon Pipe Line (MPL), Terminal, Transport and Rail (TT&R), and Marine.

ANSI Z.87.1 approved safety glasses or goggles are required to be worn under welding hoods as per the T&L Welding Safety (TNLHES006) and Personal Protective Equipment (TNLHES302) Standards. Safety glasses or goggles can be worn under most welding hoods. However some hood styles, such as some pancake styles (see picture below), may not allow the wearing of additional eye protection underneath. In these cases, another type of welding helmet must be used.

Example of a pancake-style welding hood:

**Note: Pancake hoods are not specifically prohibited*
