

Marine Transportation

Health, Environment, Safety and Security Policy

Marine Transportation is committed to excellence in Health, Environment, Safety and Security (HES&S) performance through the implementation of the Responsible Care® guiding principles.

This commitment is an essential part of our business. Additional safety commitments critical to achieving an injury free workplace are set forth in Transportation & Logistics' Statement of HES&S Safety Commitments. Meeting all of these commitments is a responsibility shared by every Marine employee, contractor and stakeholder.

The following principles will guide our HES&S performance:

- **Incident Prevention:** Marine employees and contractors strive to maintain an incident and injury free workplace, with 100 percent safe work practices and conditions throughout our operations.
- **Pollution Prevention and Resource Conservation:** Marine is committed to environmental protection and will emphasize, to the extent practical, resource conservation and the minimization of wastes, emissions and releases throughout our operations.
- **Communities:** Marine is dedicated to being a good neighbor in the communities in which we work. We will conduct our operations safely and responsibly and we will proactively consult with stakeholders on issues of mutual interest.
- **Security and Emergency Preparedness:** Security and emergency preparedness are vital functions and the responsibility of management, supervisors and employees at all levels. Marine will maintain emergency plans to protect everyone in and around our facilities, the environment and our corporate resources.
- **Risk Assessment:** Management of risk is fundamental to safe operations, products and services. Marine will systematically identify potential hazards, assess their relative significance and develop reduction measures to ensure risks are properly addressed.
- **Training and Education:** Marine will ensure that employees understand their HES&S responsibilities and that they are trained and competent to perform their assignments effectively. Marine will support education and research on the HES&S effects of our products and processes.
- **Legislative and Regulatory Compliance:** Marine will comply with all applicable HES&S laws, regulations and other requirements to which the organization subscribes. Within our sphere of influence, Marine will actively participate in the development of responsible laws, regulations and standards regarding HES&S issues.
- **Product Stewardship:** Marine will provide information to, and work with, applicable parties to foster the safe use, handling, transportation, storage, recycling, reuse and disposal of our materials, products and wastes.
- **Contractor Performance:** Recognizing that our contractors are pivotal to achieving our HES&S goals, Marine will select specific contractors based upon performance monitoring and work with them to align our common interests and promote HES&S excellence.
- **Measurement of Performance:** Marine's HES&S performance will be measured regularly using key indicators. Operations will also be monitored for compliance with applicable HES&S legislative and regulatory requirements through periodic reviews and audits.
- **Continuous Improvement:** Marine's management systems provide a framework for setting targets, measuring performance and reporting results. Marine will employ these systems to achieve continual improvement in our overall HES&S performance.
- **Communication:** Marine will clearly communicate our HES&S commitments, responsibilities and performance to our employees, the public and other key stakeholders.
